## ALTERNATIVE TEST METHODS

EYE IRRITATION AND CORROSION	SKIN IRRITATION AND CORROSION	SKIN SENSITISATION
<p>Organisation for Economic Co-operation and Development (OECD). 2019. Guidance document on integrated approaches to testing and assessment (IATA) for serious eye damage and eye irritation. No 263. Series on Testing and Assessment.</p> <p>European Chemicals Agency. 2017. Guidance on information requirements and chemical safety assessment. Chapter R.7a: endpoint specific guidance. Version 6.0.</p> <p>US Environmental Protection Agency (EPA) Office of Pesticide Programs. 2015. Use of an alternate testing framework for classification of eye irritation potential of EPA pesticide products.</p>	<p>European Chemicals Agency. 2017. Guidance on information requirements and chemical safety assessment. Chapter R.7a: endpoint specific guidance. Version 6.0.</p> <p>OECD. 2014. Guidance document on an integrated approach on testing and assessment (IATA) for skin corrosion and irritation. No 203. Series on Testing and Assessment.</p>	<p>US EPA. 2018. Interim science policy: use of alternative approaches for skin sensitization as a replacement for laboratory animal testing.</p> <p>European Chemicals Agency. 2017. Guidance on information requirements and chemical safety assessment. Chapter R.7a: endpoint specific guidance. Version 6.0.</p> <p>OECD. 2016. Guidance document on the reporting of defined approaches and individual information sources to be used within integrated approaches to testing and assessment (IATA) for skin sensitisation. No 256. Series on Testing and Assessment. Annex 1 and Annex 2.</p> <p>OECD. 2012. The adverse outcome pathway for skin sensitisation initiated by covalent binding to proteins. No 168. Series on Testing and Assessment.</p>
<p>Gather existing human, animal, and <i>in vitro</i> data; information on the substance's physiochemical properties; and information from non-testing approaches, including quantitative structure-activity relationships (QSARs), read-across, grouping, bridging, and the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) additivity approach when applicable. Determine if further testing can be waived.</p>
